## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 104-105 are rejected under 35 U.S.C. 102(e) as being anticipated by Monroe (US PAT: 7,023,913, filed 6-14-2000).

Regarding claim 104, Monroe discloses a security system which includes a first subsystem (fig. 1) and a second subsystem for displaying information (figs. 18/25-28), collected by the first subsystem while managing monitoring of the premises (fig. 1), the second subsystem remotely located relative to the first subsystem, an interface (reads on server, fig. 22) for coupling the first subsystem and the second subsystem, the interface comprising: means for receiving potential alarm condition data from the first subsystem (fig. 1), the potential alarm condition related to a first alarm event detected by the first subsystem, means for relaying the potential alarm condition data to the second subsystem (figs. 18/25-28), the potential alarm condition data received from the first subsystem and relayed to the second subsystem comprised alarm notification and real time stream of video and/or audio data, means for receiving pre-alarm and/or non-alarm video and/or audio data received from the first subsystem, means for storing the

Application/Control Number: 10/607,008

Art Unit: 2614

pre-alarm and/or non-alarm video and/or audio data from the first subsystem (col. 5 lines 34-48, col. 8 lines 1-26), and means for permitting the second subsystem to access the stored pre-alarm and/or non-alarm video and/or audio data if the interface receives the alarm notification from the first subsystem (col. 14, line 6 –col. 15, line 65).

Regarding claim 105, Monroe further teaches the following: means (reads on stored audio and video data in a server) for constructing alarm history data from the alarm condition data received from the first subsystems (fig. 1) during one or more alarm events which include the first alarm event, the storage information means further comprising means for storing alarm history constructed from the potential alarm condition data received from the first subsystem in connection with one or more alarm events which include the first alarm event, and transmitting means (fig. 1) further comprising means for transmitting the alarm history constructed from the potential alarm condition data received from the first subsystem in connection with one or more alarms (col. 5 lines 34-48; col. 8 lines 1-26; col. 9 lines 3-5; col. 14 lines 29-49).

- 3. Claims 71, 73-74, 82-87, 91-94, 97-103 are allowed.
- 4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melur Ramakrishnaiah whose telephone number is (571)272-8098. The examiner can normally be reached on 9 Hr schedule.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Curt Kuntz can be reached on (571) 272-7499. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
